

ITALIAN FRAME

DOUBLE LADDER FRAME

SINGLE LADDER FRAME

VERTICAL TUBES OF THE FRAME ARE MADE OF Ø48.3X2MM TUBE

KHK high quality external system is designed to be easy to erect & dismantle without help from professionals. The 'H' Frame, (or) vertical member, has a welded square (or) round pin on top for ease of connection. This allows you to erect the frames faster and to any height with maximum safety & stability. The system is designed not to include any loose fittings inside. The access frame system comes in six different forms all of which conform with British, Italian, Spanish & Korean standards. Non-standard sizes are available by request, for a small charge.
