

KHK Makes a Strong Impact at **BIG 5 CONSTRUCT SAUDI 2026**

KHK and THAL bring complementary strengths together to pursue new business opportunities and build enduring industry relationships across the Kingdom.

KHK Scaffolding and Formwork Ltd. LLC, UAE marked a significant milestone in its Saudi Arabian growth journey with its successful participation at Big 5 Construct Saudi 2026, held from 30 August to 2 September at Riyadh Front Exhibition & Conference Center.

Throughout the exhibition, the KHK stand attracted considerable interest from prospective customers, contractors, industry professionals and business associates. The event provided a valuable platform to showcase KHK's capabilities, establish promising customer connections, explore strategic partnerships and identify new avenues for growth across the Kingdom.

A key highlight was KHK's participation in partnership with THAL (Taurani Holdings Arabia Ltd), the Saudi associate company of Taurani Holdings Group. This strategic collaboration combines KHK's established product expertise with THAL's local market presence, creating a stronger platform to penetrate the Saudi market more extensively and develop lasting customer relationships across the construction and infrastructure sectors.

The KHK UAE team was ably led by George Thomas, Head of Sales & Marketing, whose leadership and active engagement contributed to meaningful discussions and valuable business interactions throughout the event.

Beyond showcasing its offerings, BIG 5 Construct Saudi 2026 enabled KHK and THAL to reinforce their market positioning, strengthen industry relationships and lay the groundwork for future collaborations.

With promising business prospects and stronger connections established,
**KHK, together with THAL, remains committed to expanding its footprint and
building lasting partnerships across Saudi Arabia.**

Remembering A VISIONARY. Honouring A LEGACY.

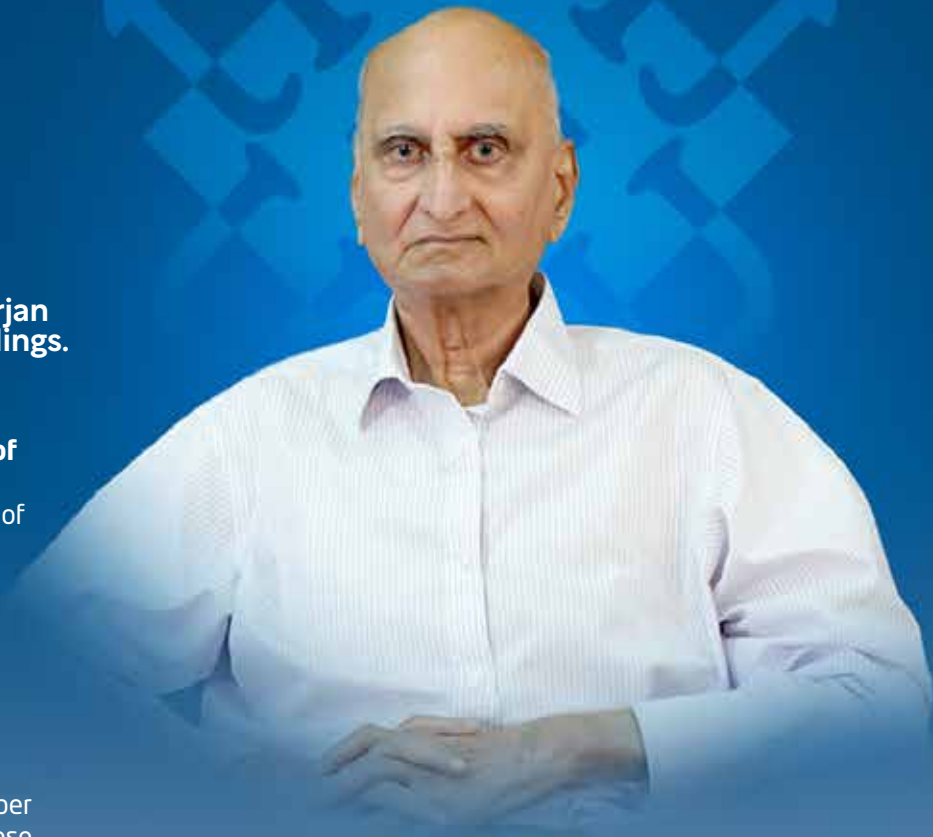

Five years on, the principles and values of Late Mr. Arjan Taurani remain woven into the fabric of Taurani Holdings.

Five years on, the legacy of Late Mr. Arjan Taurani, Founder of Taurani Holdings, continues to inspire generations. A visionary entrepreneur and a man of strong values, he built the foundation of a diversified business group through determination, integrity, perseverance and an unwavering commitment to excellence.

His pioneering spirit and belief in people, relationships and long-term value remain deeply embedded in the culture of the Taurani Group. The businesses and partnerships he nurtured continue to carry forward his vision and principles.

As we commemorate his **5th Death Anniversary**, we remember with profound respect and gratitude a remarkable leader whose contribution continues to shape the journey ahead.

His vision endures. His values live on. His legacy continues.

Mr. Arjan Taurani
(1936 - 2021)

Employee wellness event A step towards a healthier workplace

In collaboration with Amina Hospital, Ajman, we conducted an on-site wellness event featuring health screenings and medical consultations to support employee well-being and preventive care.

As part of our ongoing commitment to employee well-being, we successfully organized an Employee Wellness Event in coordination with Amina Hospital, Ajman.

The initiative was thoughtfully designed to encourage a culture of preventive healthcare and to support our employees in taking proactive steps toward maintaining good

health. During the event, employees had access to a range of essential health screening services delivered by qualified medical professionals.

These included blood pressure checks, blood sugar testing, BMI assessments, dental check-ups and one-on-one general physician consultations. The

availability of these services at the workplace made it convenient for employees to gain valuable insights into their health status without disrupting their work schedules.

The primary objective of this wellness drive was to raise awareness about common health concerns and emphasize the importance of early detection and prevention. Regular health screenings play a vital role in identifying potential risks at an early stage, enabling timely medical advice and lifestyle

adjustments. Through this initiative, employees were empowered with knowledge and guidance to make informed decisions about their personal well-being.

Expanding Horizons at TURKEYBUILD, Advancing Global Opportunities

The KHK team had the privilege of attending TURKEYBUILD in Istanbul, Turkey, as part of our ongoing efforts to broaden our global footprint and reinforce international collaborations.

This strategic participation represented a significant step toward identifying new opportunities across the global construction and industrial landscape. During the exhibition, our team

connected with industry leaders, manufacturers and prospective partners from across diverse markets. The objective was to explore innovative solutions, assess emerging technologies and foster meaningful partnerships that enhance and expand our product and service offerings worldwide.

This initiative also aligns with our long-term vision of diversifying supply channels, strengthening procurement capabilities and building resilient, value-driven partnerships that consistently deliver excellence to our clients.

Installation of an Ultra - Modern Galvanized Plant

As part of our strategic smart investment drive, we are proud to announce the commissioning of an ultra-modern galvanizing plant dedicated to steel scaffolding systems. This significant investment marks a major milestone in strengthening our manufacturing capabilities and reinforces our commitment to innovation, efficiency and sustainability.

The new facility is designed specifically for hot-dip galvanizing of scaffolding systems and components, ensuring superior corrosion resistance, extended product life and consistent quality that meets international standards. Equipped with advanced technology and optimized processes, the plant operates in an environmentally responsible manner, with a strong focus on minimizing carbon footprint and improving overall energy efficiency.

With the commissioning of this state-of-the-art plant, our total galvanizing capacity has increased threefold, reaching an impressive 80 tons per day. This substantial enhancement enables us to meet growing market demand more efficiently, reduce lead times and support large-scale infrastructure and industrial projects with greater reliability.

Beyond capacity expansion, the new galvanizing plant reflects our long-term vision of sustainable growth and smart manufacturing. By combining advanced engineering with eco-conscious operations, we continue to deliver high-quality, durable solutions while aligning with global environmental best practices.
